## WeatherHawk™ Weather Report Telephone Call Center

**Logan, UT — 9/18/2003—** WeatherHawk and Ambient LLC announce the addition of a dial-up voice interface to the popular WeatherHawk family of personal weather stations. The new system feature is called WeatherVoice™, and with a WeatherHawk weather station it turns a personal computer into a Weather Report Telephone Call Center.

Many remote locations do not have internet access but they do have phone lines. WeatherVoice enables a remote watchful weather eye on a home, cabin or business, using only a simple phone line, a voice modem connected to a personal computer and a wireless digital WeatherHawk personal weather station. With WeatherHawk and WeatherVoice, anyone can keep up to date on their local weather, from anywhere.

Every WeatherHawk is supplied with Ambient's Virtual Weather Station™ (VWS) display software. VWS includes a voice generation system with a text to speech converter that is compatible with most text-to-speech voices. With WeatherVoice, the text files are automatically updated by VWS with real-time weather conditions from a WeatherHawk personal weather station, and converted to a voice on the phone. It can even insert information from the National Weather Service.

*WeatherHawk is manufactured in the United States, and supported worldwide through a combination of affiliated companies and independent dealers. Please contact WeatherHawk as indicated below to purchase an exciting NEW WeatherHawk weather station, or for information on how to become a WeatherHawk Installer/Dealer.*

.....

WeatherHawk is a Trademark of Campbell Scientific, Inc. in the United States and/or other countries. Virtual Weather Station and WeatherVoice are Trademarks of Ambient LLC.
